Le Consortium was established in 2011 in a specifically designed 4,000 square-meter building by Japanese architect Shigeru Ban, but its history began in 1977 on the first floor of an alternative bookstore, and later in a former appliance store located at the back of a courtyard on the central market square in Dijon. Here, young academics carried out their ambition to exhibit the art of their time. Le Consortium's Collection, now permanently exhibited on the top floor of the building, includes more than 350 works. Essentially comprised of gifts from the artists who have exhibited there, it forms a true memory of these exhibitions.
